

Counting & Listing

Lesson Plan: Class 03 / LCR / 01

Overall goal of the lesson	Exercises on counting combinations
Prior knowledge required	None

MODULE 1: **Module time:** 35 minutes

Goal:	Students will learn about different ways to list and count objects
Description:	Students will learn the basics of listing and counting objects in a certain given set, with some constraints given for it.
Material required:	Physical: 03-LCR-01-WS Electronic: PPT presentation (03-LCR-01-PPTX) as a reference to teach combinations of objects.
Procedure Summary:	<ol style="list-style-type: none">1. Go over the power point presentation (03-LCR-PPTX) with the kids2. Distribute the worksheet (03-LCR-01-WS) to see how much the students have understood the concept.
Procedure Details:	<ol style="list-style-type: none">1. Start by asking question, if they like to share.2. With the help of ppt, talk about how a chocolate can shared among different kids3. Now, build a story about going to a party and they are given choices to dress up. With the help of PPT, engage with the students to see how different combinations can be made to come up with a party wear.
Assessment:	A simple lesson on teaching the basics of listing and counting of objects with a finite set and constraints
Information Broadcast:	Exercises on listing and counting.
