Bringing computational thinking to schools

Introduction:

1. Write a program to print the first 100 natural numbers .

2. Write a program to print first N natural numbers using while loop.

3. Write a program to print the following pattern. Take input from the user to print number of rows he wants to print.

```
        1
       121
      12321
     1234321
    123454321
    ...................
```
