

### Your SAC certification

**Congratulations!** You have completed your first Bird Count and you are an official citizen and community scientist. Here is your digital Bird Scouts badge. Share it with your family and friends!

### Next steps:

You now have the skills to conduct Bird Counts all the time. You have the tools and the expertise to teach others in your community how to conduct Bird Counts as well. Remember that your contributions are valuable. Every time you upload an observation on eBird you are helping scientists to better understand and protect the natural world. Our team here at SAC and our friends at eBird thank you for your contributions as a community and citizen scientist.
